Commercial Grade Electric Power Head

Advanced Technology
for a
Superior Cleaning
Performance

Distributed by:

SEBO electric power heads are German engineered to deliver optimum performance with exceptional cleaning ability for both home and commercial use. These high quality power heads can be added to any vacuum to greatly enhance its cleaning performance.

SEBO electric power heads are made to withstand heavy use on all types of carpets in commercial and residential applications. The following features set these exceptional electric power heads above all others.

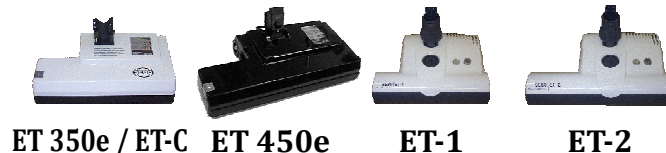

The geared belt drive on the power head maintains direct power to the brush roll without slippage.

SEBO has designed an electronic sensor system to protect this belt drive mechanism and the motor by having the power head turn off should the brush become jammed. Operation is restored by simply clearing the jam around the brush roll.

The ET-C is the same power head as the ET 350e except that it comes with the quick release neck for ease and convenience when switching SEBO tools. In addition to white, the ET-1 is also available in black.

With all these features, now is the time for you to experience any one of these exceptional power heads.

		ET 350e / ET-C	ET 450e	ET-1	ET-2
Electronic Sensor	Detects the need for a new brush strip or brush roll.	•	•	•	•
